

New Extension Consultation Form

This form is meant for us to learn about you, and is the first step in creating your dream hair. Please fill out these basic questions and provide as much detail as you think we will need.

What is IBE? Invisible Bead Extensions were designed to create more volume and/or length with both comfort and versatility. And can also add additional colors.

IBE was created by McKenzie Tuley to create a solution for the common issues that come up with many hand-tied methods including discomfort and/or damage to the clients hair due to improper bead placement and lack of versatility because of exposed beads, bonds, or braids when hair is worn up.

IBE method is light weight, secure, and balanced. Because of the unique bead and hair-weft placement, IBE ensures comfort and discretion with many options for styling including ponytails, braids and buns from the first time you wear them. There is no tape or glue involved. We also use only high quality, Remy, silicone free, ethically sourced human hair.
